

Senior Geoscientist (w/m)

Oil & Gas Industry

RAG has been making a sustainable contribution to secure the energy supply with over 70 years of oil & gas exploration and production. We are looking for a self-motivated, skilled senior professional to bring their passion and energy to an exciting new domestic and growing international exploration program.

The successful candidate will work in a Vienna based team with a significant multi-year exploration budget. In this role, you will be involved in the entire project life cycle, from conception to drilling & production using seismic interpretation, mapping, correlation and analysis.

Targets:

- Data management, regional studies, well/log analysis, correlation and 2D/3D interpretation.
- Play evaluation, seismic interpretation and attribute analysis, lead identification and prospect generation and post well evaluation.
- Preparation and presentation of technical information to partners and RAG's Senior Management.

Requirements:

- Degree in Geophysics or Geology with preferably a post-graduate degree.
- Minimum 10 years experience related to exploration in the oil & gas industry, preferably with an E & P operating company.
- Ability to work closely within a team to coordinate play identification and prospect generation, volumetric and risk assessment, peer and other technical reviews, partner and senior management meetings, etc.
- Knowledge of current seismic interpretation software (Geoframe, Petrel, etc.), plus mapping, correlation and analysis software packages will be essential.
- Good communication and organisational abilities, demonstrated flexibility, interpersonal and presentation skills in English and/or German.

Please send us your application file by e-mail to petra.schatzdorfer@rag-austria.at. We are looking forward to hearing from you!
